

ILYAS NAZIH

IT AUTOMATION & DIGITAL SYSTEMS BUILDER

Enterprise IT field operations professional and hands-on builder focused on endpoint automation, Windows systems and reliable digital tooling. Combines real-world OCP environment support with software engineering to turn repetitive IT work into controlled, auditable workflows.

EXPERIENCE

Atlas Cloud Services

IT Field Operations - OCP Group

Morocco | 1+ year

- Support and troubleshoot enterprise Windows endpoints in a controlled OCP environment, covering user incidents, VPN, Microsoft Office/Outlook, BitLocker and system health.
- Work with SCCM / ConfigMgr workflows for endpoint readiness, policy refresh, deployment support and recovery of unhealthy clients.
- Use PowerShell and repeatable diagnostic procedures to reduce manual steps, improve consistency and accelerate common field-operations tasks.
- Bridge IT operations and software development by building internal-style utilities designed for secure, traceable execution.

SELECTED ENGINEERING PROJECTS

BLADE BitLocker Lifecycle Automation & Deployment Engine

Windows / PowerShell / SCCM

Automates Ethernet checks, SCCM health, BitLocker readiness and encryption flows with controlled execution, focused sync actions and operational logging.
